Thank you for filing my complaint. I do believe the Commission owes a fiduciary responsibility to the 720,000 SCANA consumers who were the true victims but were innocent bystanders in this situation. I think, and I may be completely wrong, but the Commission's responsibility lies with the consumers, most of whom are among the voting public, and not with SCANA stockholders and SCANA management. Thank you again, Robert Rouse. These are just my opinions..

2. Please give a concise statement of your protest. * (This section must be completed. Attach additional information if necessary.)

In my opinion, you assessed the wrong parties the \$2.3 Billion. We consumers did nothing wrong. We did not elect top management who made some very questionable decisions. We just were at the mercy of you, the Commission and SCANA to raise our rates. We did not make the decision to construct the two plants. Management, appointed by the stockholders, did.

The stockholders should be assessed the future liability. They elected and perpetuated top management. By doing so the accepted the risk that their delegates/management could make decisions and would make good ones. If they did not then they/stockholders would have to assume the liability or risks of the decisions. We consumers were left in the dark and were assessed billions of dollars for a hole in the ground. Now, you are going to make us continue to pay for that hole. Again, stockholders elected management to make the decisions and must assume the liability if they make poor ones. The stockholders should be assess ALL of the costs, both past and future.

I would encourage you to contact the Securities and Exchange Commission and discuss what responsibilities belong to whom. No golden parachutes to managements and claw backs should be effected.

Just be fair to us because we are the lost sheep who did nothing wrong. You have just selected the wrong folks to be assessed.

3. Do you wish to make an appearance at a hearing in this proceeding, if scheduled, and offer sworn testimony? *

I would be happy to attend a proceeding that challenges your decision. Thank you for this opportunity to express my opinion. Justice should be equitable and meted to the faulty parties who are the stockholders who obviously elected and delegated a lot of authority to the wrong parties/management. These are my opinions.
